

Botanical Name: Pelargonium 'Vancouver Centennial'

Common Name: No common name

Type of Plant: dicot: perennial Family Geraniaceae

Habit of Growth:

Overall Shape upright, compact plant with star-shaped, brightly colored
foliage with coral colored flowers held above

Height to 18" Spread to 18" Growth Rate moderate

Environment:

Exposure outdoors full sun to partial shade

Soil required good drainage

Hardiness hardy: zones 8,9, 12-24

Morphology:

Leaves simple palmate leaves to 3" across with deeply cut, angular
lobes; center has large maroon splotch with a chartreuse margin

Flowers terminal umbels of coral-colored flowers to 1/2" across

Fruit small capsule

Propagation: stem cuttings

Usage: novelty plant for containers or beds, used for colored foliage
more than flowers; good contrast to darker green plants in a perennial border

Landscape Care:

Watering needs regular watering; not drought tolerant

Fertilizing balanced fertilizer in spring

Pruning pinch regularly to induce bushiness

Pests/Diseases tobacco budworm, aphids, spider mites

Other this variety is in a group of 'stellar' geraniums

Origin: hybrid
