

Botanical Name: Veronica incana

Common Name: Speedwell

Type of Plant: dicot: perennial Character evergreen

Habit of Growth:

Overall Shape spreading, sprawling plant with trailing stems - forms a
dense mat when established

Height 1-2' Spread 2-3' Growth Rate moderate

Environment:

Exposure outdoor full sun to partial shade

Soil prefers good drainage

Hardiness hardy -- all zones

Morphology:

Leaves oblong to elliptical to 3" long - white pubescent with
crenate margins

Flowers light blue flowers in terminal racemes

Fruit small flattened capsule

Propagation: stem cuttings, division

Usage: good source of gray color -- good facer or low filler --
rock gardens, mixes well with California native plants

Landscape Care:

Watering prefers fairly constant moisture when young -- tolerates
some drought after established

Fertilizing slow release at planting time, yearly in spring

Pruning head back occasionally to control size

Pests/Diseases root rot when drainage is poor

Special Conditions

Origin: Asia/Russia Family: Scrophulariaceae
