

Botanical Name: Euryops pectinatus 'Viridis'

Common Name: Euryops, California daisy

Type of Plant: dicot; shrub Character evergreen

Habit of Growth:

Overall Shape full, rounded with older stems becoming somewhat woody;
plant is somewhat more rangy in appearance than the grey leafed variety.

Height 2' - 3' (4') Spread equal Growth Rate moderate to rapid

Environment:

Exposure outdoors full sun

Soil prefers well draining - tolerates most

Hardiness some frost (zones 14-17, 19-24)

Morphology:

Leaves pinnatifid, green, alternate to whorled, 2" - 3" long,
blade lobes 1/4" long

Flowers 1-1/2" - 2" diameter, yellow daisies, nearly year-round

Fruit small achene

Propagation: softwood cuttings

Usage: fast filler, year-round color, relatively short-lived
(5-8 years), good for instant color effect

Landscape Care:

Watering moderate in sandy soils, little in heavy soils; thrives
with moderate watering

Fertilizing little required - balanced in spring

Pruning after heaviest bloom (Feb. thru June) - anytime in summer

Pests/Diseases relatively free

Special Conditions

Origin: South Africa Family: Asteraceae
