

Botanical Name: Leucanthemum paludosum (Chrysanthemum paludosum)

Common Name: Annual daisy

Type of Plant: dicot: annual Character spring annual

Habit of Growth:

Overall Shape upright, multi-branched annual with small daisy flowers

held above foliage; flowers resemble miniature Shasta daisy

Height to 1' Spread to 1' Growth Rate moderate

Environment:

Exposure outdoor full sun

Soil takes most any soil with good drainage

Hardiness hardy (all zones) may overwinter in mild areas

Morphology:

Leaves narrow, nearly linear leaves to 1-1/2" long, strongly

toothed on margins

Flowers small heads to 1" across with white ray flowers, bright

yellow centers

Fruit achene

Propagation: seed

Usage: small facer or bedding plant used in pots, borders, mass

plantings and color bowls; easy care and long blooming season make this a good

choice for summer annual color

Landscape Care:

Watering takes average watering; not especially drought tolerant

Fertilizing balanced, slow release fertilizer at planting time

Pruning pinch off dead flowers to prolong bloom

Pests/Diseases none

Special Conditions none

Origin: Asia Family: Asteraceae
